Senior Web Developer

PROFILE

- With over 6 years of experience in website development and design, I bring a wealth of expertise to the table. My focus lies primarily in front-end development, where I've honed my skills in creating user-friendly interfaces and applications. Throughout my career, I've prioritized best practices to ensure top-notch quality in all my projects.
- Collaboration is at the core of my work ethic, as demonstrated by my ability to effectively work within teams to achieve common goals. Proficient in technologies like JavaScript and React, I seamlessly integrate with team members to contribute to the development process. My proficiency in React enables me to build high-performance applications that meet and exceed user expectations.
- I thrive in dynamic environments, adapting quickly to new tools and frameworks. With experience in content management and a diverse background spanning medical, social, and education industries, I bring versatility to every project. My familiarity with Agile methodologies ensures that our products meet the highest standards through rigorous testing and code quality assurance.
- As a proactive team player, I take ownership of managing code changes and ensuring product integrity through version control systems. My experience in product management underscores my commitment to delivering high-quality applications, setting and upholding standards crucial to team success. Overall, my blend of technical expertise, collaborative spirit, and commitment to excellence makes me a valuable asset to any development team.

SKILLS

1. Programming Languages:
 - JavaScript: Proficient in both vanilla JavaScript and modern ES6+ syntax.
 - HTML5: Strong knowledge of semantic HTML markup for building web pages.
 - CSS3: Proficient in CSS for styling and layout of web pages, including knowledge of CSS preprocessors like Sass or Less.
2. Front-end Frameworks and Libraries:

- React.js: Extensive experience in building interactive user interfaces and single-page applications (SPAs) using React.js.
 - Vue.js or Angular: Familiarity with other popular front-end frameworks for building dynamic web applications.
 - jQuery: Proficient in using jQuery for DOM manipulation and event handling.
3. Back-end Technologies:
- Node.js: Proficient in server-side JavaScript development using Node.js, including building RESTful APIs and server-side rendering.
 - Express.js: Experience in building web applications and APIs using the Express.js framework for Node.js.
4. Database Technologies:
- MongoDB: Familiarity with NoSQL databases and experience using MongoDB for storing and retrieving data in JavaScript-based applications.
 - SQL: Basic understanding of relational databases and SQL for querying and managing data.
5. Testing and Quality Assurance:
- Jest or Mocha: Experience in writing unit tests and integration tests for JavaScript applications using Jest or Mocha testing frameworks.
 - React Testing Library or Enzyme: Proficient in testing React components using testing utilities like React Testing Library or Enzyme.
6. Version Control and Collaboration Tools:
- Git: Proficient in version control using Git, including branching, merging, and managing repositories on platforms like GitHub or GitLab.
 - Agile Tools: Experience with Agile project management methodologies and collaboration tools like Jira or Trello for managing tasks and sprints.
7. Other Tools and Technologies:
- Webpack or Parcel: Familiarity with bundling tools like Webpack or Parcel for optimizing and bundling JavaScript and CSS assets.
 - Redux or Flux: Experience in state management using Redux or Flux architecture patterns in React.js applications.
 - Responsive Design: Knowledge of responsive web design principles and techniques for creating websites that work across different devices and screen sizes.
 - Accessibility: Understanding of web accessibility standards (WCAG) and experience in implementing accessible web interfaces.
8. Soft Skills:
- Collaboration and Teamwork: Proven ability to collaborate effectively within cross-functional teams to achieve project goals.
 - Problem Solving: Strong analytical and problem-solving skills, with the ability to troubleshoot and debug complex issues.

- Communication: Excellent verbal and written communication skills for effectively conveying technical concepts to non-technical stakeholders.
